during the hour, the continuity test is made at the shore station by means of a condenser applied to the conductor of the Cable. The effect of this is to increase the deflection on the ship's insulation galvanometer, thus serving as a continuity test. Communications from shore to ship are also made by these means. Ship can send signals to shore by simply reversing the current for certain lengths of time, answering to some understood code, or by increasing and diminishing the tension of the line according to a pre-arranged plan. All these operations may be performed without interrupting the insulation test, except for a few seconds while the current is being reversed. So far for the new system in the electrical room as compared with last year.

[*To be continued.*]

HOLLOWAY'S PILLS.—Conscientious Conviction.—No investment of money can be so profitable as that which insures good health. It has been established beyond dispute that Holloway's Pills, which cost but a trifle, will successfully wrestle with and overthrow disease. In all the many forms in which dyspepsia or indigestion presents itself it may be thoroughly removed by these purifying and gently aperitive Pills, assisted by a diet which must be simple in quality and moderate in quantity. Long indisposition, resulting from defective appetite or imperfect assimilation, yields to this efficient treatment, and nausea, disagreeable tastes in the mouth, headache, and the annoying collection of phlegm which plagues the dyspeptic in the morning, will be banished by these balsamic and strengthening Pills.

The Times.

WEDNESDAY, AUGUST 1, 1866.

BUSINESS!—No sooner were "posters" issued from our office on the morning of last Saturday, announcing that the Steamer *Bloodhound* would leave the Galway wharf at the hour of 2, same day, and take passengers for Heart's Content, than parties flocked to the office of the proprietors of the boat, Messrs. BAINE, JOHNSTON & Co., and secured berths. The starting of the Steamer at the hour named was, to the discomfiture of the anxious sight-seers, prolonged till about 4 o'clock, owing to the low state of the tide which caused the ship to ground; and tho' the full pressure of steam had been applied, aided and assisted by the physical force of a large number of citizens, NEPTUNE'S supremacy prevailed down to the above period, when the *Bloodhound* was relieved—and off she started to the delight of all on board: the number of passengers being between 60 and 70. The arrival of the vessel at the happy village, with other information, (of which the lengthy and interesting diary of the Atlantic Telegraph expedition forms, in part, a portion) is noted in this publication.

The Steamer *Dauntless*, which has also been employed in forwarding passengers to Heart's Content, is now engaged in the service of the Telegraph Company conveying despatches between Cape Ray and Cape Breton. The absence of both Steam-tugs from our waters (the *Diamond* having gone with the Northern mails in place of the regular Packet, *Ariel*, with His Excellency the Governor and Her Majesty's Attorney-General on an important mission) must be a great drawback to the interests of the trade; for shipping bound in may, from strong adverse winds, or the want of wind, be detained in the offing with valuable cargoes for a considerable period (as in olden times) to the injury of all concerned,—the merchant as well as shopkeepers who are in the habit of importing their own supplies, and may lose many a good customer from the non-receipt of the needful. Great delay, too, from the same cause, cannot but attend vessels outward-bound. But, the force of circumstances will take its course, "nevertheless, notwithstanding."

A very large and fashionable party will proceed to Harbour-Grace to-morrow, *viâ* Portugal Cove, (where a Steamer will be in waiting) on the invitation of Mrs. RIDLEY to a ball, "to celebrate the successful laying of the Atlantic Cable." No doubt this will be followed by very many other balls and entertainments—particularly in St. John's—in recognition of the pleasing and wonderful accomplishment, to which we had reference on Saturday, and which will at once belt us in happy union with the mother country, &c. GILES says the cable will be a death-blow to the FENIANS. We heartily pray it may—and to all other fiendish and treasonable plottings. "One thing is certain," (observes the London thunderer)—"the secret plottings of the faction are becoming daily developed. General SWEENEY, the military chief of no insignificant position, has given "a very frank statement of the operations which he had designed to execute in Canada, had his recent invasion of the colony been successful; and we can well afford to smile at the combination of audacity and credulity expressed in this strange plot; but, as the history of Fenianism becomes gradually revealed, we shall find reason to be thankful for our escape from the perils of a barbarous insurrection."

TELEGRAMS.

Heart's Content, July 29th.

The *Bloodhound* arrived here at five this morning. She left again at three, with new Cable on board for the repair of the Gulf line.

The *Spray* arrived here at three P.M. to-day.

The *Great Eastern* will remain here this week, and then proceed to pick up the old Atlantic Cable.

Mr. Mackay left here on Friday night in H. M. S. *Niger* for Cape Breton with despatches from the Queen to the President.

He will also superintend the repairing of the Gulf Cable.

London, July 29.

Her Majesty attended Divine service this morning in Windsor Chapel accompanied by Prince Teck. Her Majesty is in good health.

A riot has taken place in Hyde Park in reference to the Reform bill. Five hundred constabulary were upon the ground, but were unable to quell the disturbance. The Guards were ultimately called out, and put down the riot without using their sabres.

Postscript.

☞ We have great pleasure in laying before our readers the following very pleasing telegram, as received by our local government yesterday:—

"*Heart's Content, 31st July.*

Queen's message has been delivered to the President. Reply has been sent through the Cable to the Queen. *Great Eastern* is now firing a salute.

CYRUS W. FIELD."

☞ We learn from one or two of the *voyageurs* who returned here yesterday from Heart's Content, *viâ* Portugal Cove, that they with other passengers had been landed at the latter place from a fishing-boat,—having previously, between the hours of 9 and 10 yesterday morning, taken passage in the *Ellen Gisborne* from Harbour-Grace for the Cove; but she had scarcely left her moorings with a number of souls on board when her machinery gave out, "causing for the moment considerable alarm." Happily, however, the crippled Steamer managed to "drag her slow length along" back to the spot from whence she had started and landed her passengers. Here is another lamentable proof of the horrible condition of THAT boat which, to the manifest and great discredit of her owners—to apply no stronger language—has been permitted, down to the morning of yesterday, to ply as a Packet in the extensive and dangerous waters of Conception Bay, to the great peril of life and property!!!

Friend SQUAREY! what *can* you say of your "darling NELLY" *now*? Look to this—nay, let the whole public look to it and at once protest against the MONSTROUS INIQUITY! We, as a public journalist, but discharge an imperitive duty in thus promptly noticing the unpleasant circumstance, and which is likely to cause not a little inconvenience to the party invited to proceed to Harbour Grace, as noticed in another column.

H. M. Surveying Steamer returned to port yesterday.

H. M. S. *Lily* arrived here last evening from Heart's Content.

The *Diamond* also arrived here last night from the Northward, last from Harbour-Grace, with a number of passengers—and reports,—"the fishery good in some places,—bad in others."

To the Editor of the Times.

SIR,—Permit me to have another word. Keefe denies a certain charge or charges preferred against him. Will he, then, be so good as to inform the government, or the public, through the Press, what he really *did* say in reply to the very proper observations of General Doyle about the "rascally *Fenians*?" Keefe must not flatter himself he is out of the mud.

A VOLUNTEER.

Died, on Sunday afternoon, after a long illness, in the 20th year of his age, Charles, second son of Mr. Charles Collier. His funeral will take place from his late residence, Forest Road, to-day (Wednesday) at 3 o'clock, when the friends of the family are respectfully requested to attend.
